SUN-series Aquarium Light

new product 2011

LED Akvariebelysning
för den proffesionella akvaristen

AQUARIUM LIGHT

SUN Series (Aquarium Light) integrates the original and fashionable designs with high practicability. In the following several pages, we will introduce the product features, specifications and installation solutions. New standards have been set for every original SUN series of product and its accessories to enable the convenient installation under various conditions.

Experience a light better than the sunlight in the aquarium

04-05 Introduction of SUN Series (Aquarium Light)

06-09 Specifications and Dimensions of SUN Series (Aquarium Light)

10-11 Installation Solutions of SUN Series (Aquarium Light)

12-13 Aquarium Light Overview

SUN Series (Aquarium Light)

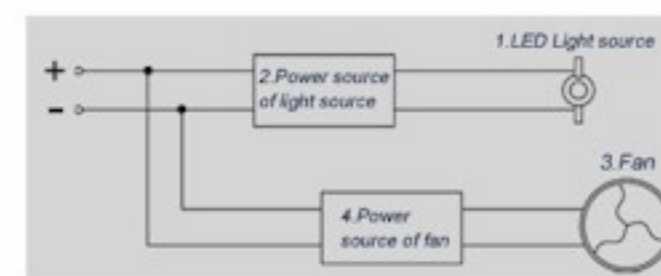

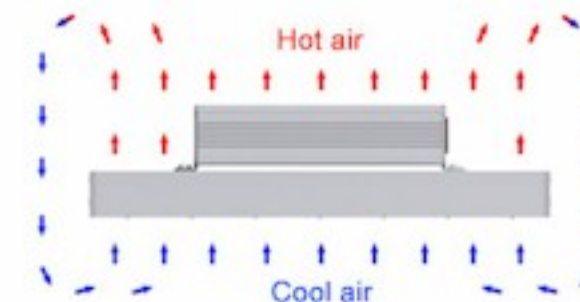

Product Features:

- Pure aluminum pressure casting lamp, adopt the natural principle of hot air rises, strengthen the heat dispersion, and effectively prolong the service life of the product.

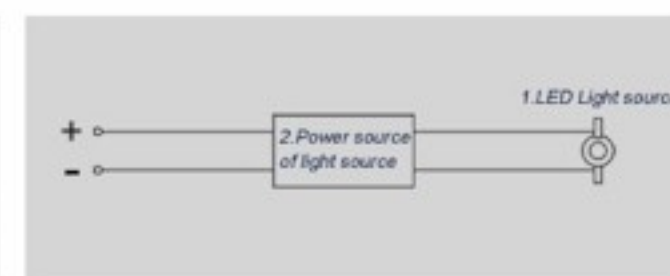

Four service life control links of previous products:

1. Light source
2. Power source of light source
3. Fan
4. Power source of fan. Any fault of the above-mentioned four links is fatal to products.

Two service life control links are required for SUN series of new products: 1. Light source 2. Power source of light source. Reduction of two links can improve the product stability by 100% and 0 loss can be achieved in heat dissipation.

Old products

New Products

- High oxidation treated surface, enhance the oxidation resistance and ensure the long time beautiful appearance of the product.
- The light source may be customized based on your requirements.
- The appearance and dimensions of lamp (For detailed information, see P06-07) may be customized based on your requirements.
- Four installation solutions are provided for the convenient installation under different conditions. (For detailed information, see P08-09)
- The surface of the light source is covered with a layer of highly transparent polyester resin to ensure the excellent light transmittance as well as the good waterproof effect.

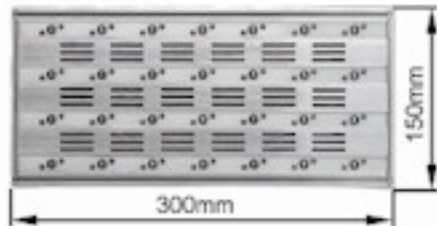

- The power distribution box can be removed from the lamp and randomly placed.

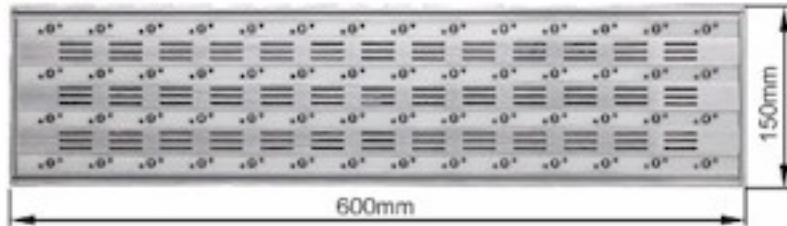

- The product can be used for the aquarium with a span of 130cm at most.

Ceiling Installation

The aquarium light can be hanged on the top of the wall.

Rack Installation

By using racks, set the aquarium light over the aquarium. The rack feet can be adjusted according to the width and dimension of the aquarium.

Fixed Stay Installation

The plant light can be hanged on the side face of the wall with freely adjustable height.

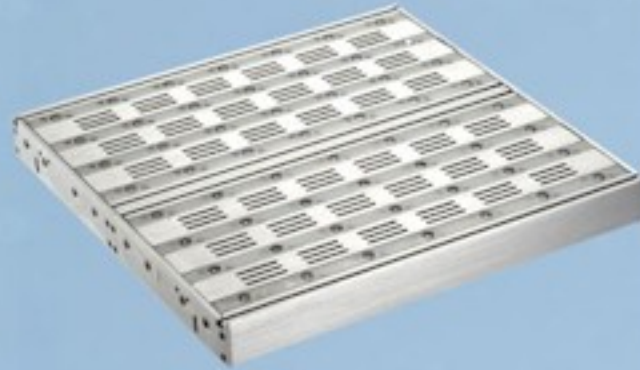

Hook Installation

Hang the aquarium light on the hook with steel wire.

Model: MA-1530-28
Power: 26W
Luminous Flux: 1200Lm

Model: MA-3030-56
Power: 56W
Luminous Flux: 2400Lm

Model: MA-T8ST-15
Power: 15W, 30W

Model: MA-T5SM-8
Power: 8W, 16W
